- 1 Time Value of Money TVM The Foundation This fundamental concept underscores the fact that money received today is worth more than the same amount received in the future due to its earning potential Think of it like this would you rather have 100 today or 100 a year from now The 100 today can be invested and earn interest making it more valuable McLaney provides the tools primarily present value PV and future value FV calculations to quantify this difference Understanding TVM is critical for evaluating investments loans and other financial decisions
