the 2nd international conference on national evaluation capacities held on 12-14 September 2011 in Johannesburg, South Africa, allowed nearly 100 participants to share experiences on use of evaluation for public policies and programmes from countries with different levels of development of national monitoring and evaluation systems. Identifying lessons and constraints in implementing national monitoring and evaluation systems with a focus on use of evaluation and identifying supply and demand for technical assistance in strengthening institutional capacity for national use of evaluation under the umbrella of South-South and triangular cooperation. This publication presents the major themes related to evaluation use for public policy and programmes which were touched upon during the discussions.

Sustainable Tourism VI contains the proceedings of the sixth international conference in this successful series on sustainable tourism. Tourism has become a major international industry with many countries all over the world relying on the income it produces. Its economic advantages as a major source of finance and employment frequently leads to its active promotion by governments and other institutions independent of the consequences on the environment, ecology and social structure of affected regions. Issues concerned with achieving environmental, social and economic sustainability of tourism alongside the governance mechanisms needed to support sustainable tourism are highlighted. Also discussed is how new resources ought to be employed to avoid the errors committed in the past and propose remedial actions when required. This book takes a broad view of this sophisticated and complex industry and examines the practice of sustainable tourism from global travel trends through to destination and site management. Innovative solutions including ecological tourism as well as cultural initiatives that will lead to better approaches to tourism with the objective of preserving the diversity of our planet. The demands of tourism can contribute to the destruction of the natural and cultural environment upon which it depends. The natural and cultural landscape's capacity to accommodate the local and worldwide effects of tourism and the implications for the human economy and society constitute very important study objectives to protect the natural and cultural landscape. New solutions need to be developed which minimise the adverse effects of tourism. This can be achieved through new strategies involving the active collaboration of society as a whole. Topics covered include: tourism strategies, environmental issues, emergent strategies for tourism development, community issues, climate change, safety and security, tourism as a tool of development, art, architecture and culture, heritage tourism, special interest tourism, marine and coastal areas, tourism sport, tourism city, tourism impact, tourism and protected area, rural tourism, transport and tourism, education and training, theme parks, destination management, planning and development, simulation models, social and physical infrastructure.
