neoreaction is not your grandfather s conservatism but the web 2 0 era marriage between modern engineering principles and classical anti democratic thought its central tenet is that the enlightenment was a mistake and in the dark enlightenment nick land burns progressivism to the ground salts the earth around its ashes and raises an altar to anti humanism in its place land explicates the main ideas of neoreaction the cathedral neocameralism formalism etc always viewing democracy liberalism and politics in general through the lens of darwinism the result is something like thomas hobbes as ghostwritten by h p lovecraft included in this volume is an unreleased essay by land on the writing and impact of the dark enlightenment absolutely none of this incendiary work has been proven wrong in the ten years since it was written no doubt it will remain relevant for many years to come

a brilliant work of intellectual interpretation by our foremost historian of enlightenment ideas whatmore rescues the enlightenment from today s circular debates and places it where it belongs in the pulsing chaotic era of its genesis and demise christopher de bellaigue the enlightenment is popularly seen as the age of reason a key moment in human history when ideals such as freedom progress natural rights and constitutional government prevailed in this radical re evaluation historian richard whatmore shows why for many at its centre the enlightenment was a profound failure by the early eighteenth century hope was widespread that enlightenment could be coupled with

toleration the progress of commerce and the end of the fanatic wars of religion that were destroying europe at its heart was the battle to establish and maintain liberty in free states and the hope that absolute monarchies such as france and free states like britain might even subsist together equally respectful of civil liberties yet all of this collapsed when states pursued wealth and empire by means of war xenophobia was rife and liberty itself turned fanatic the end of enlightenment traces the changing perspectives of economists philosophers politicians and polemicists around the world including figures as diverse as david hume adam smith edmund burke and mary wollstonecraft they had strived to replace superstition with reason but witnessed instead terror and revolution corruption gross commercial excess and the continued growth of violent colonialism returning us to these tumultuous events and ideas and digging deep into the thought of the men and women who defined their age whatmore offers a lucid exploration of disillusion and intellectual transformation a brilliant meditation on our continued assumptions about the past and a glimpse of the different ways our world might be structured especially as the problems addressed at the end of enlightenment are still with us today

this book is about the ways in which modern enlightenment rather than liberating humanity from tyranny has subjected us to new servitude imposed by systems of mass manipulation electronic vigilance compulsive consumerism and the horrors of a seemingly unending global war on terror the main intellectual aims of this title are the following the analysis of spectacle the criticism of providential enlightenment and the examination of positive dialectics the spectacle in this case is the apotheosis of the culture industries a total inversion of reality and of our existences providential enlightenment is not only a critique of the failure of enlightenment but of the mutilation of historical enlightenments positive dialectics signal a new era of intellectual engagement in the construction of our historical future during a time in which national democracies seem an imperial farce it is not enough for intellectuals faced with all this destruction to blithely recommend resistance the book thus ties american british french and german theoretical traditions into a reflexive challenge to the notion of intellectual as critic and argues instead for a trespassive tradition of cultural leadership

this book summary and analysis was created for individuals who want to extract the essential contents and are too busy to go through the full version this book is not intended to replace the original book instead we highly encourage you to buy the full version the world is ending soon or is it has progression truly become a far fetched possibility for us steven pinker distinguished cognitive psychologist and author thinks otherwise indeed the problems that we are facing today are becoming more and more dreadful but we have also conquered our primitive and ill advised problem solving approaches in this book pinker stresses that enlightenment s ideal of using science and reason over the impractical and perilous implications of excessively idealistic religious and political beliefs has been instrumental in unlocking numerous advancements in economic growth healthcare food security science and technology safety and solidarity among nations backed by seventy five comprehensive graphs this

book exhibits how intellectual reasoning and deduction along with the significant improvements in technology research and education have proven that now is the best time to be alive check out steven pinker s enlightenment now and discover how its ideals are the key to continuously improving our lives
