as we move further into the 21st century despite the fact that new technologies have emerged machining remains the key  
operation to achieve high productivity and precision for high added value parts in several sectors but recent advances in computer  
applications should close the gap between simulations and industrial practices this book machining dynamics and parameters  
process optimization is oriented toward the different strategies and paths when it comes to increasing productivity and reliability  
in metal removal processes the topics include the dynamic characterization of machine tools experimental dampening techniques  
and optimization algorithms combined with signal monitoring
