in identifying a free society milan zafirovski offers a holistic sociological approach to modern free society as a total social system the book examines the main conditions and indicators of modern free society such as democracy a free economy a free culture and a free civil society hence political economic cultural and individual liberty entwined with equality and justice it provides specific and aggregate free society estimates for western and related societies based on a variety of objective rankings data and reports on the basis of these estimates the book identifies liberal societies as the freest as a whole and their anti liberal opposites as the most unfree

in this incisive critical analysis of today's free market capitalism Edward Luttwak shows how it is vastly different from the controlled capitalism that flourished so successfully from 1945 to the 1980s. Turbo capitalism is private enterprise liberated from government regulation, unchecked by effective trade unions, unfettered by concerns for employees or investment restrictions, and unhindered by taxation. It promises a dynamic, expanding economy and new wealth. The winners, the architects and acrobats of techno-organizational change, become much richer. The losers, the majority, become relatively or absolutely poorer and are forced by downsizing to take the traditional jobs of the underclass, more and more of whom end up in prison. Edward Luttwak challenges the conventional wisdom that jobs lost in old industries will be replaced by jobs in new ones. If General Motors fires you, Microsoft will not hire you; instead, you'll be working in services, often poorly paid. Led by the United States, closely followed by Britain, turbo capitalism is spreading fast throughout Europe, Asia, and the rest of the world. Only in France and Japan is there any resistance. Without the two great forces that check its enormous power in the United States—a powerful legal system and the stringent rules of American Calvinism acknowledging the great efficiency of turbo capitalism—Luttwak provides no solutions but describes in powerful detail the major societal upheavals and inequities it causes and the broad dissatisfaction and anxiety that may result. He suggests this is a high price to pay for this great dilemma of our times: they call it the free market, but that is shorthand for much more than the freedom to buy and sell what they celebrate, preach, and demand. It is private enterprise liberated from government regulation, unchecked by effective trade unions, unfettered by sentimental concerns over the fate of employees or communities, unrestrained by customs barriers or investment restrictions, and molested as little as possible by taxation. What they insistently demand is the privatization of state-owned businesses of all kind and the conversion of public institutions from universities and botanical gardens to prisons, from libraries and schools to old age homes into private enterprises run for profit. What they promise is a more dynamic economy that will generate new wealth while saying nothing about the distribution of any wealth, old or new. They call it the free market, but I call it turbo capitalism because it is so profoundly different from the strictly controlled capitalism that flourished from 1945 until the 1980s and that brought the sensational novelty of mass affluence to the peoples of the United States, Western Europe, Japan, and all other countries that followed their paths. Edward Luttwak

This book is a study of modern politics from a socialist and left-wing perspective. As a collection of essays on political ideas, it presents an analysis of the crisis of our times through examining the various crises and problems which define modern society. It considers individual political aspects of the contemporary problems of capitalist politics, ranging from economic crisis to social crisis, from imperialism to the environmental crisis. As such, it serves to outline a solid argument for a better politics today: the politics of socialism and democratic socialism.

The intermixture in our own time of European or Western civilization with non-Western civilizations and cultures is producing a new global civilization. It is the

purpose of this book to tell the story of western civilization from the dark ages when europe emerged as a cultural entity up to the transmutation of western civilization in the 20th century it is not a story of continual progress throughout its history the european world has experienced fluctuations of fortune and circumstance periods of harmony and periods of strife and discord nor does the story have a simple obvious moral the attentive reader however can learn much about his own cultural heritage and so arrive at a better understanding of the world in which he lives and his own place in it

has capitalism failed is it fundamentally greedy and immoral enabling the rich to get richer are free markets darwinian places where the most ruthless crush smaller competitors where vital products and services are priced beyond the ability of many people to afford them capitalism is the world s greatest economic success story it is the most effective way to provide for the needs of people and foster the democratic and moral values of a free society yet the worst recession in decades has widely and understandably shaken people s faith in our system even before the current crisis capitalism received a bad rap from a culture ambivalent about free markets and wealth creation this crisis of confidence is preventing a full recognition of how we got into the mess we re in today and why capitalism continues to be the best route to prosperity how capitalism will save us transcends labels such as conservative and liberal by showing how the economy really works when free people in free markets have energy to solve problems and meet the needs and wants of others they turn scarcity into abundance and develop the innovations that are the foremost drivers of economic growth the freedom of democratic capitalism is for example what enabled henry ford to take a plaything of the rich the car and transform it into something affordable to working people in the capitalist system economic growth doesn t mean more of the same grinding out a few more widgets every year it s about change to increase overall wealth and give more people the chance for a better life
