rapid developments in molecular and systems biology techniques have allowed researchers to unravel many new mechanisms through which plant cells switch over to alternative respiratory pathways this book is a unique compendium of how and why higher plants evolved alternative respiratory metabolism it offers a comprehensive review of current research in the biochemistry physiology classification and regulation of plant alternative respiratory pathways from alternative oxidase diversity to functional marker development the resource provides a broad range of perspectives on the applications of plant respiratory physiology and suggests brand new areas of research other key features written by an international team of reputed plant physiologists known for their pioneering contributions to the knowledge of regular and alternative respiratory metabolism in higher plants includes step by step protocols for key molecular and imaging techniques advises on regulatory options for managing crop yields food quality and environment for crop improvement and enhanced food security covers special pathways which are of key relevance in agriculture particularly in plant post harvest commodities primarily for plant physiologists and plant biologists this authoritative compendium will also be of great value to postdoctoral researchers working on plant respiration as well as to graduate and postgraduate students and university staff in plant science it is a useful resource for corporate and private firms involved in developing functional markers for breeding programs and controlling respiration for the prevention of post harvest losses in fruit vegetables cut flowers and tubers

competing in both high and low cost operating environments can present a number of unique challenges in light of global competition and the changing scope of various industries due to technological advancement these challenges must be addressed in order to ensure business success global perspectives on achieving success in high and low cost operating environments features a collection of research and case studies addressing contemporary issues surrounding operational success in various regions business professionals managers academics and upper level students will find this publication an essential resource for the latest tools and solutions for managing operations in diverse operating environments

disease pathways an atlas of human disease signaling pathways is designed to fill a void of illustrated reviews about the cellular mechanisms of human diseases it covers 42 of the most common non oncologic diseases and illustrates the connections between the molecular causes of the disease and its symptoms this resource provides readers with detailed information about the disease molecular pathways while keeping the presentation simple pathway models that aggregate the knowledge about protein protein interactions have become indispensable tools in many areas of molecular biology pharmacology and medicine in addition to disease pathways the book includes a comprehensive overview of molecular signaling biology and application of pathway models in the analysis of big data for drug discovery and personalized medicine this is a must have reference for general biologists biochemists students medical workers and everyone interested in the cellular and molecular mechanisms of human disease over 145 full color illustrations of the molecular and cellular cascades underlying the disease pathology disease pathways are based on computational models from elsevier s disease pathway collection published for the first time outside of pathway studio commercial software each relationship on the pathway models is supported by references to scientific articles and can be examined at freely available online resources

this text presents our current progress in the understanding of the chemistry and physiology of various categories of food colorants it

includes reviews of the chemistry and physiology of food colorants carotenoids anthocyanins and the oxidative transformation of tea catechins there are also examinations of the aspects of non enzymatic browning including the structures color and formation of maillard reaction products the polymerization in browning of chicken skin the maillard reaction in beer and the influence of non enzymatically formed melanoidins on human gut bacteria

encyclopedia of gastroenterology second edition four volume set provides a comprehensive and concise reference on all aspects of gastroenterology and hepatology including the organs in the gastrointestinal system their functions in health and disease and strategies or procedures to resolve or prevent problems and disease this concise up to date information includes comprehensive sections on the impact of nutrition gastrointestinal microbiota lifestyle commonly used drugs and surgical procedures on health and disease since the first edition attention to the roles of nutrition and gastrointestinal microorganisms microbiota formerly microbiota in health and disease has skyrocketed in addition an entirely new section on obesity and diabetes is included presents comprehensive coverage of every topic within gastroenterology offers researchers a one stop fully referenced resource to explore questions includes teaching tools multimedia and interactive elements provides readers with multi layered content and a media rich learning resource for both instructors and students covers hot new topics in gi health and disease including new sections on stem cells intestinal bacteria obesity and intestinal microbiota
