the remarkable story of how the allies used psychoanalysis to delve into the motivations of the nazi leadership and to explore the mass psychology of fascism

explores the interdisciplinary dimensions of black studies

this book deals with black studies from a number of angles with the intention of being both historically cogent as well as

critical it offers some personal viewpoints from my vantage as a former black studies instructor and an award winning black studies essayist 1986 council of black studies and as a long time student who seriously studied the history of my people with an eye toward making a contribution to our future this book begins with a look at what i view as some of the foundation points during the outset of black studies departments on american college campuses the campuses selected which i believe contributed most profoundly to the formation of black studies in america are san francisco state university uc berkeley emory university pennsylvania university rutgers university university of florida gainesville university of massachusetts uc santa barbara uw milwaukee vassar university and yale university i then move to an analysis of an article where african american graduate students made the grandiose claim that black studies was swaggering into the future the article to be analyzed which appeared in the april 12 2012 edition of the chronicle of higher education was so insultingly disheartening that one of the sections in my analysis is titled swaggering into the future or staggering into it i add another section that closes out my views under the sub heading the local swagger blackface in action shifting and focusing to the university of nebraska omaha i offer some history and analysis of how the department came into being on that campus i follow up with a more scathing critique of what has taken place in recent years due to external administrative decisions and internal internecine conflicts information regarding the intentional mis education of black students throughout the omaha public school district are also explored finally an overview and analysis of the role of black studies related courses at the high school level the issues of direct input downsized integration and diluted involvement will be explored black studies has undergone a plethora of challenges over the decades today in 2018 the issues are more than just racist reactions from anglo administrations the issues include the rise in a right wing among students at american universities and the general malaise of black students except during times of responding to various crises the links to the community appear to be disappearing except in the south and the east coast and various special interests including the gay lobby are latching onto the black movement and using that movement to push their own agenda this book is a starting point and is open to critique and analysis but every great advocacy for change must begin somewhere

if no one has written a book that is as personal and direct as this one let this then be the first sifa ina ote watu weusi all praise is due to black people

the critical black studies reader is a ground breaking volume whose aim is to criticalize and reenvision black studies through a critical lens the book not only stretches the boundaries of knowledge and understanding of issues critical to the black experience it creates a theoretical grounding that is intersectional in its approach our notion of black studies is neither singularly grounded in african american studies nor on traditional notions of the black experience though situated work in this field has historically grappled with the question of where are we in black studies this volume offers the reader a type of criticalization that has not occurred to this point while the volume includes seminal works by authors in the field as a critical endeavor the editors have also included pieces that address the political issues that intersect with among others power race class gender sexuality religion place and economics

early modern black diaspora studies brings into conversation two fields early modern studies and black studies that traditionally have had little to say to each other this disconnect is the product of current scholarly assumptions about a lack of archival evidence that limits what we can say about those of african descent before modernity this volume posits that the limitations are not in the archives but in the methods we have constructed for locating and examining those archives the essays that make up this volume offer new critical approaches to black african agency and the conceptualization of blackness in early modern literary works historical documents material and visual cultures and performance culture ultimately this critical anthology revises current understandings about racial discourse and the cultural contributions of black africans in early modernity and in the present across the globe

a surge of african american enrolment and student activism brought black studies to many us campuses in the 1960s sixty

years later black studies programmes are taught at more than 1 300 universities worldwide this book is the first history of how that happened black studies founder and movement veteran abdul alkalimat offers a comprehensive history of the discipline that will become a key reference for generations to come structured in three broadly chronological sections black studies as intellectual history as social movement and as academic profession the book demonstrates how black people themselves established the field long before its institutionalisation in university programmes at its heart black studies is profoundly political black power the new communist movement the black women s and students movements each step in the journey for black liberation influenced and was influenced by this revolutionary discipline

following a history of racial oppression and segregation black americans were able to move in greater numbers into previously all or predominantly white colleges and universities however they encountered normative structures that excluded or distorted the black experience and denied black perspectives as a result black studies grew up reconstructing the humanity of a historically oppressed devalued and exploited group knowledge production in black studies offers distinct insights into the strength and resiliency of the human spirit and poses exemplary models for enlightened social change this book examines the foundational parameters and historical mission of the field of african american studies which emerged from a broad based black intellectual tradition defined by the metaproblem of cultural hegemony semmes seeks to broaden our thinking about the scope and content of black studies the end of black studies identifies afrocentric or black centered approaches to knowledge production that are distinctly different from yet inclusive of a historiographical emphasis on ancient egypt but alternative to the claim of a singular african worldview this book will appeal to students and scholars interested in the field of black studies including african american studies africana studies africology and pan african studies it will be a source of critical discussion for graduate seminars examining theory building and or knowledge production research and writing in black studies the end of black studies has received the 2017 outstanding book award from the national council for black studies read the introduction
